Art Unit: 3641

1. Applicant's election of Group II and Species A) in Paper No. 5, filed 24 August 2001, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 19-20 stand withdrawn as based on nonelected species.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3 rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Burns et al. WO 98/06682.

It appears that this publication anticipates the instant claims. It appears that the instant situation is as set forth in *In re Lukach*, 169 USPQ 795, also *In re DeSeversky*, 177 USPQ 144, where the instant c-i-p application is somewhat narrower than the publication, more than a year prior to the instant filing date.

To the extent necessary, variation of specific notoriously well known details such as the various well known gas generating compositions would have been obvious to one of ordinary skill in the art. It is well settled that optimizing a result effective variable is well within the expected ability

of a person or ordinary skill in the subject art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980), *In re Aller*, 220 F.2d 454, 105 USPQ 233 (CCPA 1955).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Further, applicants should note the references of record in parent application S.N. 08/695,954.

6. Any inquiry concerning either this or an earlier communication from the Examiner should be directed to Examiner Edward A. Miller at (703) 306-4163. Examiner Miller may normally be reached Monday-Thursday, from 10 AM to 7 PM.
